

Solar Eclipse Viewing Party

Monday, August 21

9:30AM - 11:30AM

Beckman Institute & Lawn

California Institute of Technology

The Great American Solar Eclipse will pass over North America the morning of August 21. While California won't get views of the total solar eclipse, we will still be able to see a partial eclipse as the shadow of the Moon covers more than 60% of the Sun. We'll have solar telescopes, eclipse glasses, a live stream from the path of totality, and astrophysicists on hand to help everyone get the most out of this rare experience. Join us for this free event open to everyone (including children)!

Co-sponsored by the NASA Jet Propulsion Laboratory

Astronomers and volunteers will be present to guide you through the eclipse and answer questions about the Sun, eclipse, and astronomy. This is a free event open to everyone. No reservations are needed.

Partial eclipse lasts ~2 hours, but come only as long as you want. Event will occur rain or shine.
