**STARGAZING &
LECTURE SERIES**

The Truth About Black Holes

A Lecture by Leo Stein

Friday, March 23rd, 8:00PM

Cahill Center for Astronomy and Astrophysics
California Institute of Technology

Black holes: the most powerful objects in the universe. Are they really ravenous space monsters, or merely misunderstood? What does spaghetti have to do with black holes? Are black holes actually black? We'll go over what astrophysicists know and don't know about black holes, and try to clear up some common misconceptions.

These are free lectures at a public level followed by guided stargazing with telescopes (weather permitting). All events are held at the Cahill Center for Astronomy and Astrophysics at Caltech. No reservations are needed. Lectures are 30 minutes, stargazing lasts 90 minutes. Stay only as long as you want.

For directions, parking, weather updates, and more information, please visit:
