

Sunil Golwala — Curriculum Vitae

Division of Physics, Mathematics, and Astronomy
California Institute of Technology
Mail Code 367-17
Pasadena, CA 91125

308 Cahill
Voice: 626-395-8003
Fax: 626-584-9929
email: golwala@caltech.edu

Research Interests

Observations of the Sunyaev-Zeldovich effect to study dark energy and cluster astrophysics
Direct searches for dark matter
Measurements of the cosmic microwave background
Development of cryogenic detectors for particle physics, cosmology, and astrophysics

Education

Ph. D., Physics, University of California, Berkeley, 2000
Dissertation title: *Exclusion Limits on the WIMP-Nucleon Elastic-Scattering Cross Section from the Cryogenic Dark Matter Search*
Advisor: Bernard Sadoulet
M. A., Physics, University of California, Berkeley, 1995
B. A., Physics, with general and subject honors, University of Chicago, 1993

Employment

Assistant Professor of Physics, California Institute of Technology, 2003–
Millikan Postdoctoral Scholar, Physics, California Institute of Technology, 2000–2003
Graduate Student Research Assistant, Center for Particle Astrophysics and Department of
Physics, University of California, Berkeley, 1994–2000
Graduate Student Instructor, Department of Physics, University of California, Berkeley, 1993

Fellowships and Awards

Department of Energy High Energy Physics Outstanding Junior Investigator, 2006 – 2009
Alfred P. Sloan Foundation Research Fellow, September, 2004 – September, 2006
Millikan Postdoctoral Fellowship, Physics, California Institute of Technology, 2000–2003
Mitsuyoshi Tanaka Dissertation Award in Experimental Particle Physics, American Physical
Society, 2001
Department of Education Graduate Fellowship, University of California, Berkeley, 1993–1994
Richter Grant for Undergraduate Research, University of Chicago, 1992–1993

Professional Memberships

American Physical Society
American Astronomical Society
Society of Photo-Industrial Engineers

Teaching

Physics 1a, Fall 2009, freshman mechanics (teaching assistant).
Physics 1c, Spring 2005, freshman electricity and magnetism (teaching assistant).
Physics 106ab, Fall 2004-Winter 2005, Fall 2005-Winter 2006, Fall 2006-Winter 2007, analytical mechanics
Physics 125ab, Fall 2007-Winter 2008, Fall 2008-Winter 2009, quantum mechanics
Physics 135c, Spring 2007, seminar course on non-accelerator particle physics

Advisees

Postdoctoral:

Dr. Philippe Rossinot, June 2004–April 2006, antenna-coupled bolometer arrays.
Current position: chargé de mission, Centre d'Analyse Stratégique –
département recherche technologie et développement durable
Dr. Gensheng Wang, September 2004–August 2007, antenna-coupled bolometer
arrays, MKID noise physics, and CDMS data analysis. Current po-
sition: Postdoctoral researcher, Materials Science Division, Argonne
National Laboratory.
Dr. Jack Sayers, January 2008–June 2008, currently NASA Postdoctoral Pro-
gram Fellow, JPL (Adviser: Dr. H. Nguyen, June 2009–). Bolocam
massive cluster Sunyaev-Zeldovich effect observations and analysis, at-
mospheric noise studies, MUSIC mm/submm camera, CCAT Sunyaev-
Zeldovich effect science planning
Dr. R. Walter Ogburn, January 2008–, Moore postdoctoral scholar, BICEP2/Keck
Array CMB polarization experiments
Dr. Matt Hollister, February 2009–, MUSIC mm/submm camera
Dr. Thomas Downes, September 2009–, MUSIC mm/submm camera, Bolocam
massive cluster Sunyaev-Zeldovich effect observations and analysis

Graduate:

Jack Sayers, July, 2003–December, 2007, Bolocam Sunyaev-Zeldovich survey
analysis/atmospheric noise studies. Ph. D., physics, Fall, 2007. Cur-
rent position: NASA Postdoctoral Program Fellow, JPL (Adviser: Dr.
Hien Nguyen)
Zeeshan Ahmed, September, 2005–, CDMS data analysis, development of a multi-
wire proportional chamber for radioactivity screening. 5th year physics
graduate student, candidacy completed.
Nicole Czakon, July, 2008–, MUSIC submm/mm camera, Bolocam massive
cluster Sunyaev-Zeldovich effect observations and analysis. 5th year
physics graduate student, NASA Graduate Student Research Fellow.
Justus Brevik, April, 2006–, (official adviser: A. Lange). Development and com-
missioning of detector arrays, focal plane hardware, and readout sys-
tem for BICEP2 CMB polarization receiver. 5th year physics graduate
student, candidacy completed.
David Moore, April, 2007–, Development of MKID-based dark matter and op-
tical/UV photon detectors, CDMS data analysis. 4th year physics

graduate student, candidacy completed.

Randol Aikin, September, 2007–, Receiver design and commissioning for BICEP2 CMB polarization receiver, 3rd year physics graduate student.

Ran Duan, September, 2008–, Design of photolithographic bandpass filters for MUSIC, software-defined radio readout of MKIDs. 2nd year electrical engineering graduate student, candidacy completed.

Rebecca Tucker, October, 2009–, SPIDER CMB polarization receiver. 2nd year physics graduate student.

Seth Siegel, September, 2009–, MUSIC construction and commissioning, MUSIC massive cluster Sunyaev-Zeldovich effect observations and analysis. 1st year physics graduate student.

Undergraduate, etc.:

Jonathan Bird, Caltech B.S. Physics (2003), research assistant shared with CSO and CCAT, 2005-2006, atmospheric noise simulations.

Callum Lamb, Caltech B.S. Physics (2006), research assistant, development of focal plane hardware for SPIDER and BICEP2/Keck Array. Began graduate school in astronomy at University of Chicago, Fall, 2007.

Randol Aikin, University of Colorado B.A. Astronomy (2006), research assistant, worked on receiver design for SPIDER and BICEP2/Keck Array. Began graduate school in physics at Caltech, Fall, 2007.

Edward Perepelitsky, Caltech B.S. Physics (2008). Bolocam and MKID camera physical optics modeling for SURF and senior thesis projects. Began graduate school in physics at University of California, Santa Cruz, Fall, 2008.

Aamir Ali, Caltech physics undergraduate, senior thesis on modeling of Sunyaev-Zeldovich massive clusters and submillimeter galaxy observations with CCAT (2009-2010).

Four Caltech Summer Undergraduate Research Fellowship students

A local high school teacher (Tobias Jacoby, Blair High School, PUSD) and five high school students

Committee Memberships, Scientific Service, etc.

Member of the Bolocam and MUSIC instrument teams. Bolocam has been available as the 1 mm and 2 mm facility camera at the Caltech Submillimeter Observatory from Spring, 2004, onward. 50% of the Observatory's time is available to the international astronomical community. Ten refereed publications have been produced from Bolocam data to date and at least three more are in preparation. The Multiwavelength Sub/millimeter Inductance Camera (MUSIC) will replace Bolocam in 2011 and provide simultaneous imaging at 850 μm , 1.1 mm, 1.3 mm, and 2 mm.

Bolocam representative to Caltech Submillimeter Observatory Time Allotment Committee, Fall, 2003–.

Physics Graduate Admissions Committee, Caltech, 2003–2007.

Cahill Astrophysics Building Committee, Caltech, 2004–2008.

Keck Institute for Space Studies, Caltech

Member of development committee, 2004–2007.

Associated scientist, 2008–.

Chair, CMB/Sunyaev-Zel'dovich science working group and member, instrumentation working group, Cerro Chajnantor Atacama Telescope (25-m submillimeter/millimeter telescope in Chile under study), 2004–

Proposal Review Panels:

NSF Physics Division Particle and Nuclear Astrophysics

NSF Office of Polar Programs Antarctic Aeronomy and Astrophysics

NSF Astronomical Sciences Division Extragalactic Astronomy

NSF Astronomical Sciences Division Astronomical Technologies and Instrumentation

DOE EPSCoR

NASA Postdoctoral Program

JPL Director's Research and Development Fund

Governing Board, Moore Astrophysics Sensor Initiative, 2006-2012, Caltech.

Author of two companion white papers for the Astro2010 Decadal Survey, *Understanding the State of the Intracluster Medium in Galaxy Clusters* and *Calibrating Clusters as a Tool for Cosmology via Studies of the Intracluster Medium*

Author of *Sub-Kelvin Detectors for Non-Accelerator Particle Physics* section for the Particle Data Group's *Review of Particle Physics*, to appear in 2009.

Outreach Activities

Participant in Caltech Classroom Connection, Fall 2004–. CCC is a program that couples Caltech researchers (faculty, postdocs, and graduate students) with high school science teachers in the Pasadena Unified School District. The Caltech participants aid in development and execution of (math- and physics-related) classroom activities and act as role models for students thinking about career plans. A portion of my research group (1 postdoc, 2 graduate students, and myself) engages in biweekly in-class activities with 3 physics classes at Gabrielino High School (San Gabriel) led by Kevin McClure and, in the past, with 2 physics classes at Pasadena High School led by Ben Taylor. We are exploring a new partnership with J. Thuku.

Participant in Siemens Summer Research Connection, 2008. Jack Sayers and I mentored a local high school teacher and three high school students in a research project on Bolocam sky noise measurements.

Assorted public lectures.

Sunil Golwala — Publications

Asterisks indicate accepted, refereed publications. *Harzing's Publish or Perish*¹ reports a *h*-index of 13 for 14 years since first publication, based only on published papers.

1. J. Sayers, S. R. Golwala, *et al.*, “Scientific Optimization of the Multicolor Submillimeter Inductance Camera (MUSIC),” in preparation for *Astrophysical Journal*.
2. S. R. Golwala, S. Ameglio, *et al.*, “A Joint Thermal Sunyaev-Zeldovich Effect and X-ray De-projection Analysis of 17 Massive Galaxy Clusters,” in preparation for *Astrophysical Journal*.
3. D. C. Moore, B. A. Mazin, *et al.*, “Titanium superconducting coplanar waveguide microwave resonators,” in preparation for *Journal of Applied Physics*.
4. S. R. Golwala, R. Mahapatra, *et al.*, “Identification of Surface Electron Background in the Cryogenic Dark Matter Search Experiment,” in preparation for *Physical Review D*.
5. Z. Ahmed, D. S. Akerib, *et al.*, “Results from the Final Exposure of the CDMS II Experiment,” **astro-ph/0912.3592**.
6. *S. R. Golwala, “Sub-Kelvin Detectors for Non-Accelerator Particle Physics,” accepted for publication in *The Review of Particle Physics*.
7. *Z. Ahmed, D. S. Akerib, *et al.*, “Analysis of the low-energy electron-recoil spectrum of the CDMS experiment,” **astro-ph/0907.1438**, submitted to *Physical Review D*.
8. *J. Sayers, S. R. Golwala, *et al.*, “Studies of Millimeter-Wave Atmospheric Noise Above Mauna Kea,” **astro-ph/0904.3943**, accepted for publication in *Astrophysical Journal*.
9. S. R. Golwala, “Future Developments in Low-Temperature Detectors for CMB and Submillimeter Astronomy,” to appear in *Proceedings of the Thirteenth International Workshop on Low Temperature Detectors*, AIP Conference Proceedings (2010).
